Triangle Fire in collaboration with
GATR

Brad Wilson

- Fire Safety & Risk Consultant
- Retained firefighter + rural background
- Living in the New Forest national park
- 2016 Horse & Hound Article
- Safety & Security of stables and horses
- Risk assessments e.g. Health & Safety, Crime Prevention and Fire Prevention
- Solutions

Key Statistics from the UK Insurance Market

- In 2015 NFU Mutual paid out over 100 million pounds for fire related damage
- 18.2 million of these claims were for fires in stables, barns and outbuildings
- A 7 million pound increase on 2014
- Top three causes of fire were electrical, fire spread from external causes and arson

Key Benefits of the System

- Low impact, cost effective stainless steel pressfit pipework.
- Quick to install minimising impact on both owners and equines alike.
- Low annual service costs.
- Robust for the environment.
- High sensitivity provides rapid detection.
- LASD has the ability to monitor Ammonia levels
- Use of a “Green” Suppressant agent.
- Bolt on options such as auto dialer, liner heat detection.
- Automatic release of system.

Health & Safety
